ABOUT ME

When was the last time you became completely immersed in the task at hand that you lost track of time and didn't even want to eat, getting into the so-called "flow state"? It happens to me quite often when coding. I must admit, it is addictive.

Software development for me is not just a job, it offers me engaging challenges to continually learn and improve my skills. It's what I do for work as well as for leisure.

Below you'll find projects I've completed recently that showcase the skills I've acquired so far.

TECHNICAL SKILL SET

- **HTML5**
- **CSS3**
- **JavaScript ES6**
- **REACT JS**
- **SASS**
- **GIT**
- **REDUX**
- **AJAX**
- **NODE JS**
- **SQL**
- **jQuery**

MY EXPERIENCE

ASIL ECOMMERCE STORE

https://asilecommerce.netlify.app/

Fully functional full-stack eCommerce store.
Built using React's functional components, hooks, and the Context API for state management.
Started using SASS for more efficient and well-organized CSS code.
Integrates Strapi for payment processing and Auth0 for user authentication.
CommerceJs provides us with the back-end and database with wich we interact via it's API.

PERSONAL BOOKSHELF WEB APP

gustavupp.github.io/book-lookUp/index.html

I wanted to build something more robust, more JavaScript-heavy. A virtual bookshelf to keep track of the books you read and take a peek at the latest titles.
This project relies heavily on Asynchronous Javascript AJAX, interacts with two major APIs (Google Books and NY Times), is designed with ES6+ Modules and functional programming. (no libraries)

VIZZETO PIZZARIA WEBSITE

https://gustavupp.github.io/vizzeto/index.html

My first in a long time pure HTML5, CSS3, Javascript website.
What has this project thought me: How easily Javascript can manipulate DOM elements and handle events, the CSS's flexbox, Grid, Media queries, and a mobile-first design approach.

SUPPORT TECHNICIAN   CTIS Tecnologia | 2009 - 2011

At the beginning of my professional career I worked as an IT Technician, for today's biggest Latin America IT company. There I learned the fundaments of computer networks, troubleshooting problems, and providing first-class customer support.

FORMAL EDUCATION

Bachelor of Translation And Interpreting   UNINOVE - Brazil | 2013 - 2016
Certificate III In Information Technology   UNINOVE - Brazil | 2009 - 2010
